

Ex.no:7B	DATA VISUALIZATION USING TABLEAU (GOOGLE TRENDS DATASET)

Aim:

To perform data analysis, data preparation, and visual exploration on the Google Trends dataset in Tableau Desktop to analyze search trends, keyword popularity, geographical patterns, time-based trends, and search interest for meaningful insights.

Algorithm:

1. Data Ingestion & Connection
2. Connect Tableau Desktop to the Google Trends dataset as a text file source.
3. Verify field data types such as Keyword, Date, Search Interest, Region, Category, and Related Queries.
4. Data Cleansing & Transformation
5. Handle missing or null values across important fields such as Search Interest, Keyword, Region, and Date.
6. Verify numerical and categorical field types for accurate analysis.
7. Exploratory Visual Analysis
8. Search Interest Analysis: Compare average search interest between different keywords.
9. Trend Analysis: Analyze search interest across dates to identify changes and overall trends.
10. Geographical Analysis: Analyze search interest across different regions.
11. Keyword Analysis: Analyze relationships between keywords and their search popularity.
12. Dashboard Assembly & Formatting
13. Combine key worksheets into an interactive Google Trends Analysis dashboard.

Output:

Result:
